Celebrating Earth Day

MADISON – In celebration of the 46th anniversary of Earth Day, Representative Beth Meyers (D-Bayfield) released the following statement regarding the importance of natural resources and environmental consciousness.

“Earth Day is the perfect time for us to reflect on the benefits that we reap from living in such a wonderful natural environment, but it is increasingly important to look forward and protect these special places for future generations. Earth Day gives us an opportunity to learn from our collective pasts while building connections to the broader environment in the future. Northern Wisconsin is our home, but we are also connected to ecosystems on all ends of the planet. Recognizing those connections is a good first step in uniting with our fellow global citizens to make the world a healthier place.”
